

CableTwin brand guide

The Waze of the cable factory · Automate or Die 2026 · Team SUPCOM

Brand idea

Three cable lines; one stops (orange); a mint recovery route bypasses the stop. The mark tells the product story: when a production route closes, CableTwin finds and compares the alternatives, and the human decides.

Primary logo and compact mark

Files: **cabletwin-logo-light.svg** (for light backgrounds), **cabletwin-logo-dark.svg** (for dark backgrounds), **cabletwin-logo-monochrome.svg** (single colour), **cabletwin-mark.svg** (compact). PNG exports are provided alongside.

Palette

Deep green #092925	Teal #0F766E	Mint #C9F36B	Cream #F5F4ED	White #FFFFFF	Orange accent #E9763B
------------------------------	------------------------	------------------------	-------------------------	-------------------------	---------------------------------

Typography

Headlines and UI numerals: **Segoe UI Bold / Arial Bold**. Body: Segoe UI / Arial. Documents: Helvetica / Arial. Only standard, portable system fonts are used so every deliverable renders identically on jury machines.

Usage rules

- Keep clear space around the logo of at least the height of one cable line in the mark.
- Minimum sizes: mark 16 px; full wordmark 140 px wide.
- Use the dark-background variant on deep green; the light variant on white or cream.
- Mint is the accent for routes, key metrics and calls to action — never for body text on white.
- Orange marks the incident only; never use it as a general accent.
- Do not recolour, stretch, outline, rotate or add effects to the logo.
- Never associate the brand with a real cable manufacturer; always label operational results as synthetic.

Applications

Slides: deep-green title/closing slides, cream content slides (see the Phase 2 deck). Video thumbnail: brand/social/cabletwin-demo-thumbnail.png. Product UI: the frozen prototype palette is the source of this system.
